Figure 1 consists of six histograms arranged horizontally, each representing the distribution of the number of non-zero elements in the vector x for a specific value of n . The x-axis for all plots is labeled 'x' and ranges from 0 to 60. The y-axis is labeled 'count'. The plots are for $n=10, 20, 30, 40, 50,$ and 60 . As n increases, the distribution of non-zero elements becomes more concentrated around zero, with the peak count increasing significantly.
